Introduction

At Gold Chip Data, we specialize in providing premier secure destruction, installation and data relocation services. Our goal is to ensure the safe and efficient disposal, transfer, and handling of sensitive data, hardware, and infrastructure, helping businesses maintain security and operational efficiency during critical phases.

Why Gold Chip Data?

- **Premier Techs:** Our skilled professionals are here to make data management and security straightforward and reliable.
- **Tailored Solutions:** We customize our services to fit your unique needs, ensuring the best possible results.
- **Cutting-Edge Technology:** We use the latest tools and technologies to keep your operations running smoothly and efficiently.
- **Dependable Service:** Count on us for accurate, secure, and environmentally responsible solutions.
- **Ongoing Support:** We're here to help you every step of the way, ensuring a seamless experience.

Services

1. Full Service Decommission

- What We Do: We handle the decommissioning and recycling of racks, rows, or entire data centers.
- Why It Matters: Provides a tailored approach to meet your decommissioning needs efficiently.

2. Data Center Relocation

- What We Do: We manage the entire data center relocation process, from planning to reinstallation.
- Why It Matters: Ensures a smooth and stress-free transition with personalized support.

3. Full Rack Install

- What We Do: Expert installation of full racks with quotes personalized to your project.
- Why It Matters: Ensures your network setup is done right, quickly, and accurately.

4. Network Cabling / De-Cabling

- What We Do: Professional network cabling and de-cabling with custom quotes for your needs.
- Why It Matters: Enhances your network infrastructure with precision and care.

5. Immersion/Liquid Cooling Installations

- What We Do: We install cutting-edge immersion cooling systems to boost efficiency and reduce energy use.
- Why It Matters: Enhances server performance and saves on energy costs with innovative cooling solutions.

6. Device/Cable/Rack Recycle Service

- What We Do: Responsible recycling of devices, cables, and racks with a focus on eco-friendliness.
- Why It Matters: Handles e-waste responsibly, helping you stay green and compliant.

7. E-Waste Disposal

- What We Do: We provide responsible e-waste disposal services to ensure electronic devices are properly and safely recycled or disposed of.
- Why It Matters: Proper e-waste disposal prevents harmful environmental impact and ensures compliance with environmental regulations.

8. Data Eradication

- What We Do: We wipe data from hard drives completely, making them safe for resale or return.
- Why It Matters: Guarantees data is permanently removed, supporting both security and environmental responsibility.

9. Data Destruction

- What We Do: We offer secure, on-site, and mobile data destruction services to safely eliminate sensitive information.
- Why It Matters: Keeps your confidential data protected and ensures you're compliant with data protection standards.

10. Office Clean-outs

- What We Do: Efficient office clean-outs with a commitment to sustainability and responsible disposal.
- Why It Matters: Clears clutter and organizes your workspace for better productivity.

11. Secure Transportation

- What We Do: We provide secure transport with armored vehicles, armed guards, and GPS tracking.
- Why It Matters: Protects your sensitive information during transit, ensuring safety every step of the way.
